Victoria Falls National Park

Victoria Falls National Park is a tiny piece of protected land surrounding Victoria Falls, one of the world's three great waterfalls. Situated in western Zimbabwe in the town of Victoria Falls, the views are incredible and you can follow a path right along the edge of the gorge. The mighty Zambezi creates a roar and a huge spray of mist that can be seen from many miles away. The falls are also known as *Mosi-oa-Tunya*, an incredibly descriptive name that captures the essence of this very special place so well - translating to the "Smoke that Thunders."

As a result of the spray from the falls, a mini rainforest exists in the surrounding area, creating a wildlife hotspot. Species such as lion and leopard occasionally come through while sightings of elephants are more common. Above the falls, hippo and crocodiles abound, amongst a large array of wildlife - an added bonus to a visit to this World Heritage Site and one of the Seven Natural Wonders of the World.

Beat Malaria

Africa is full of bugs that come in all shapes and sizes, most are benign creatures looking to live out their lifecycles in peace and harmony. Some have stings that can really hurt (and may need medical attention) and others bite, leaving nasty, itchy bites. But when it comes to mosquitoes, they can leave more than just a red, swollen itch machine...

Malaria is a real threat, especially during the rainy season when the anopheles mosquito that carries malaria is breeding. It's the females that bite and spread the disease, which can, in some cases, make you really ill. So please take malaria seriously and take action to prevent infection. Here are some tips to help you...

Prevention better than cure

The best way to prevent malaria is to take prophylaxis and use an anti-malarial drug.

We can recommend Malanil or Malarone as well as Mozitec. Consult your doctor for more information and check for any contra-indications with medicine you already take as well as possible side effects you need to be aware of.

Cover up, buttercup and spray, spray, spray

When the sun starts to sink, put on long pants and long sleeves to minimise possible bites and spray the hell out of your legs and arms (even covered) with a good bug spray or smear with a bug stick. Don't forget your ears! And cheeks! And ankles.

Mozzies love ankles.

Doom your room

Use bug spray to knock down insects in your room or tent at night, before you go to dinner. Give it a good all-over spray, shut the doors/flaps and walk away. Here in Sarf Efrica we have a spray called Doom. Others are called Target, Peaceful Sleep and Morein.

For the majority of accommodations, your room is prepared for you by the wonderful house keepers so no need to worry about the above.

Use your mozzie net

That gorgeous, diaphanous netting around your bed is not a romantic come-on, it's designed to keep winged, bitey things at bay. So use it. Along with all of the above.

Talk to us

We'll give you the full lowdown on where you're going and what the risks are in terms of malaria so that you can make an informed choice about how to prevent it.

It's all in the detail

We kindly request that our guests adhere to the smaller charter flight rules and regulations regarding baggage limitations when flying throughout Southern or East Africa. This does not apply to your International, Regional or Domestic flights with commercial airlines.

Due to the nature of charter and shuttle flight services, aircraft are smaller than typical airliners and therefore have much smaller luggage holds.

Need to Know

Luggage is restricted to 20 kg per person on charter flights.

Bags should be soft-sided, flexible bags.

Bags with a solid frame do not constitute 'soft bags'.

Bags **MUST** be completely flexible to facilitate being stowed in the 'belly pod' luggage compartment of the light inter-camp transfer aircraft.

By not adhering to these luggage requirements, travellers stand to cause delays and incur additional costs to themselves.

This 20 kg includes both hand luggage and travel luggage.
